

MRT Station List

Homework 2

Homework Goal

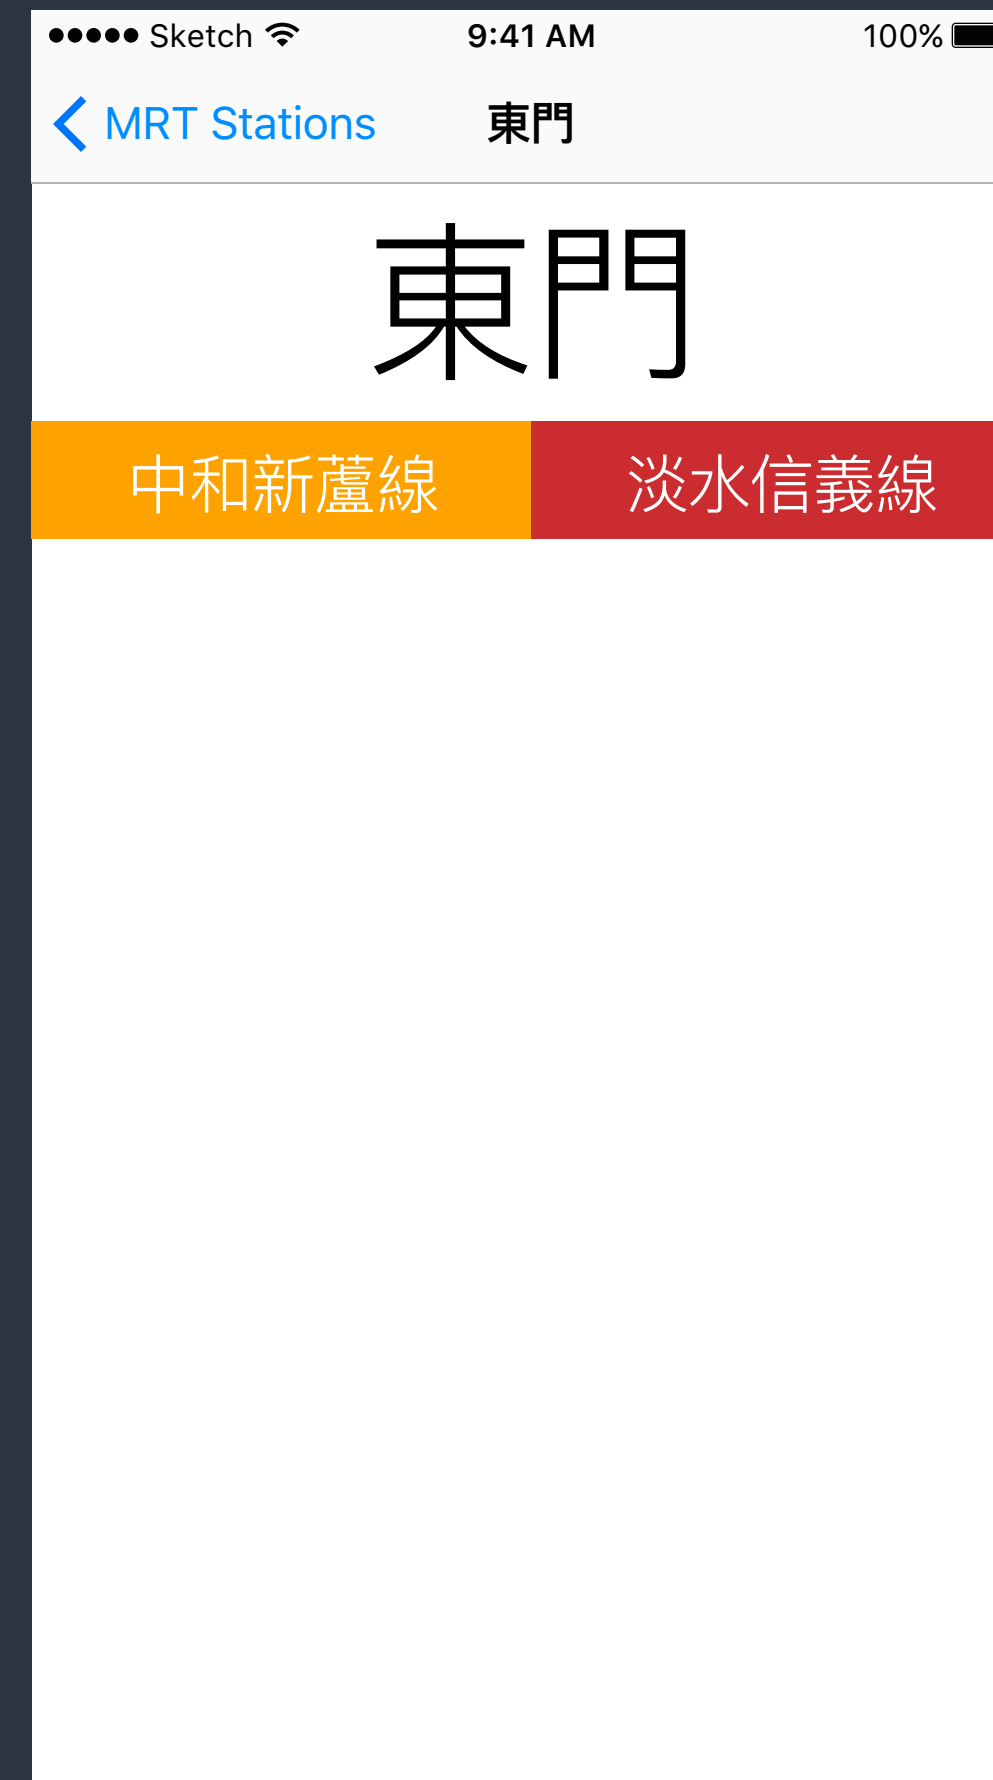

- Process JSON data
- Use Storyboard to create table view cells
- Use Storyboard Segue

Homework Spec

Name labels are left aligned.

Line labels are right aligned.

The station name should vertical align to the view even in landscape

Color blocks should be extended to fullscreen even in landscape

Homework Submission

- Host your homework with git services.
Use GitHub or Bitbucket. Or any other git host services we can access.
If your repository is private, remember to grant T.A. access permissions.
- We would manually review your app to judge your homework.
- All homework would be checked by human.
So don't be a copycat or a cheater. We would find you.

Homework Submission

- We would fetch the tag `homework2-ready` and use its commit time as the time you submit your homework.
Make sure you know how to use `git-tag`.
- The soft deadline of this homework is **12:00 PM 5/12 2016**.
After the soft deadline, you could still submit your homework. But the credits you received would be only **60% of original one**.
- The hard deadline of this homework is **12:00 PM 5/19 2016**.
You are still encouraged to finish it for your learning. But we don't give your any credits for this homework after this deadline.
